

No. : 003/UN6.C9/TU/MKB/2020
Subject : Board of Editor's Decision

January 6, 2020

Dear Authors,

Thank you very much for your interest in publishing your work in Majalah Kedokteran Bandung. Due to an increasingly high number of submission causing a large backlog of papers awaiting publication and based on our preliminary screening, we regret to inform you that your manuscript entitled: **Platelet Rich Fibrin Addition on Autogenic Bone Graft Enhance Fracture Healing of Rabbit's Tibial Long Bone Defect Fixated with Plate and Screw Analyzed Histologically with Salkeld Scoring System**, it is currently not possible for us to further consider your manuscript for publication in the Majalah Kedokteran Bandung (MKB).

Although your paper is not considered a high priority paper for MKB, we find that your paper is interesting; thus, would like to help you to publish it in a more suitable journal. Hence, we would like to offer you to transfer your paper to **Althea Medical Journal**, which is also indexed on **SINTA as S3**, which meets the requirement for claiming the credit score into your performance as a lecturer.

We appreciate your support of MKB and look forward to receiving another submission from you in the near future.

Thank you.

Sincerely yours,

MKB
Majalah Kedokteran Bandung
