

Conflict of Interest Declaration

Here by the author(s) certify(s) that the manuscript entitled :

**AUTOANTIBODIES PROFILES AND THORAX HRCT SCAN IN
SCLEROSIS SYSTEMIC WITH RESTRICTIVE LUNGS DISEASE**

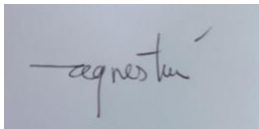

is an original work and is not under review at any other publication. Author and all co-authors have seen and agreed with the contents of the manuscript and there is no financial interest to report. This manuscript is ready for publication in the International Journal of Integrated Health Science.

Author (s) (please write your name with academic degree(s) and sign)

1st author

Name: Winda Agnestia Maranna Saragih

Signature :

2nd author

Name: Sumartini Dewi

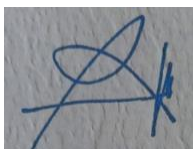

Signature :

3rd author

Name: Rachmat Gunadi Wachjudi

Signature:

4th author

Name: Verina Logito

Signature :

A handwritten signature in black ink, appearing to read 'Verina', written on a light-colored background.

5th author

Name: Anna Tjandrawati

Signature :

A handwritten signature in blue ink, appearing to read 'Anna', written on a light-colored background. The signature is written over a horizontal line.

Title of manuscript:

**AUTOANTIBODIES PROFILES AND THORAX HRCT SCAN IN
SCLEROSIS SYSTEMIC WITH RESTRICTIVE LUNGS DISEASE**

Enter the names of everyone who contributed to your manuscript by entering all required information.

To.
Editor in Chief
International Journal of Integrated Health and Science

Dear Sir,

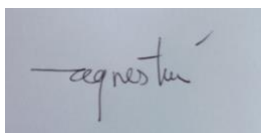

Please find the submission of our manuscript,
“Autoantibody Profiles and Thorax HRCT Scan in Systemic Sclerosis with Restrictive Lung Disease”
which we would like to submit for publication in the International Journal of Integrated Health Science.

This is an original article related to specific autoantibody and interstitial lung disease in systemic sclerosis patients in Dr. Hasan Sadikin General Hospital West Java Indonesia. Most of systemic sclerosis patients in our hospital have restrictive lung disease confirmed by spirometry due to interstitial lung fibrosis. We are also developing systemic sclerosis registry for further study, cohort study and clinical trial study for interstitial lung disease.

This study aimed to identify clinical manifestations, specific autoantibodies profile and interstitial lung disease among systemic sclerosis patients with restrictive lung disease in a tertiary referral hospital in West Java province. Our study population consists of 36 subjects with systemic sclerosis and restrictive lung disease and investigate specific autoantibody. All the subjects underwent high resolution computed tomography to diagnose interstitial lung disease.

Author and all co-authors have seen and agreed with the contents of the manuscript and there is no financial interest to report. We certify that the manuscript submitted is an original work and is not under review at any other publication. We thank you for considering our manuscript for publication in the International Journal of Integrated Health Science and look forward to hearing from you at your earliest convenience.

Sincerely yours,

Winda Agnestia Maranna Saragih, MD
