

**Cover letter**

Medan, 14 Mei 2022

To:

Editor-in-Chief of Majalah Kedokteran Bandung (MKB)  
in Bandung, Indonesia

Dear Professor,

We wish to submit an original research article entitled "Differences in CD95L levels and blood test results in primary and secondary dengue infection patients" for consideration by Majalah Kedokteran Bandung.

We confirm that this work is original and that the manuscript has not been published elsewhere, nor is it currently under consideration for publication elsewhere. We also confirm that there is no falsification or fabrication of data and no plagiat content in the article.

We believe that this manuscript is appropriate for publication by Majalah Kedokteran Bandung because it explains the difference between CD95L levels and blood test results in primary and secondary dengue infection patients, the study was conducted to prove the theory that explains that secondary dengue infection from different serotypes from primary infection will develop into severe dengue. I really hope that my manuscript can be published in Majalah Kedokteran Bandung.

All authors of this manuscript have approved the final version of this submitted manuscript.

We have no conflicts of interest to disclose.

Thank you for your consideration of this manuscript.

**Sincerely,**

A handwritten signature in black ink, appearing to read 'Nurfadly', with a horizontal line above the first part of the name.

[Nurfadly]

## ***Author's data***

Title of manuscript:

Differences in CD95L levels and blood test results in primary and secondary dengue infection patients
